Projects

Scholars Degree College, Laravel □

A content-driven website with a dynamic backend and an intuitive admin panel for efficient management.

Mawaad Foundation, OpenCart ☑

A e-commerce platform for trading construction materials. Designed for B2B & B2C customers, it connects suppliers and buyers for seamless bulk and individual purchases.

ITS The Education Group, Laravel □

Built a dynamic website with a robust backend, enabling administrators to update and manage content seamlessly.

Pet Nation. Laravel

A comprehensive platform for pet owners, offering pet-related services, resources, and a community for pet care and adoption.

CareCrew Services, Laravel □

A platform linking skilled professionals with users seeking services, ensuring seamless interactions and easy service bookings.

MindFirst, Laravel □

A mental health platform that connects patients with therapists, offers personalized solutions, and enables seamless appointment scheduling & payment processing.

Ne-Medic, Laravel □

A service-based platform that manages pickup and drop services for patients. Users can book cabs and nurses for specific dates, and the system handles driver assignments and payment processing.

Billion Freelance, Laravel

A freelancing platform connecting skilled professionals with businesses across various industries, including tech, design, and marketing. Developed both website & mobile app for the platform.

Myprocure, Laravel ♂

A CRM platform designed to manage purchase orders, requests for proposals, and purchase request forms. It also includes inventory management and facilitates asset allocation approvals.

Darpan Printers, CodeIgniter □

A printing press management system with dynamic job creation, cost calculations, and PO management, along with purchase and payment tracking.
